

LOPPING MACHINE MOD.CKD

Pruning machine CKP 250 for fruit trees to be applied to an all-purpose tractor equipped with front hoisting device or with standard flanging and with **hydraulic distributor** for full control of all machine functions: Side movement (50 cm), Tilt movement (30°), Height adjustment of cutting blades (50 cm) and Horizontal bar return.

It makes use of the hydraulic system of the tractor (minimum pump requirement: 55 l).

Standard equipment:

- Supporting trestle with wheels
- Flanging system

Supporting trestle with wheels

Universal flange with two modes of connection

OPTIONAL

Third point coupling element

OPTIONAL

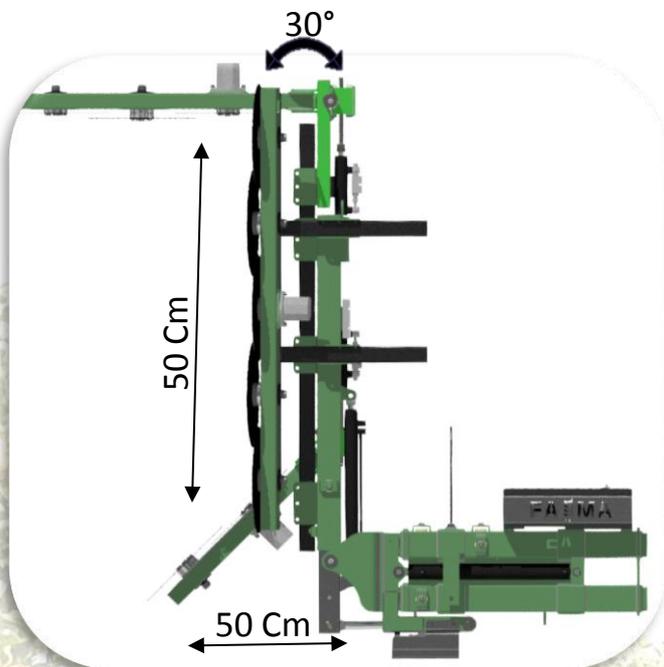

joystick

Topping bar with inclination and hydraulic lift

OPTIONAL

Kg 520

DISPONIBILI:

- CKD 235 vertical bar with 7 disks length mt 2.35
- CKD 270 Vertical Bar with 8 disks leght mt 2.70.
- CKD 300 Vertical Bar with 9 disks leght mt 3.
- Topping bar with 3 disks leght mt 1,04
- Topping bar with 4 disks length mt 1.40

40 CM Ø

8 CM Ø

OPTIONAL

Electric control distributor allowing n. 5/7 movements

OPTIONAL

Hydraulic system to be applied to an all-purpose tractor

OPTIONAL

Hydraulic system for tractors
